# CHOOSE YOUR BLADE SIZE

# CHOOSE YOUR FRAME FIXING 1, 2 OR 3

1 Tick box

**1. Frame fixed to window**

2 Tick box

**2. Frame fixed to inside of recess**

3 Tick box

**3. Frame fixed to outside of recess**

# MEASURING YOUR WINDOW

For shutter frames against the window frame measure from the groove between staff bead and window frame.

Please let us know these measurements. We will then work out the shutter sizes you require along with the frame. Please also let us know the paint colour or wood type, and hinge finish you would like.

**!Note:** Check to see if handles or locks protrude forward of the staff bead and note by how much

**Option 1. Frame fixed to window.**  
Frame can sit against the window. This leaves the sill free to be used

**Option 2. Frame fixed to inside of recess.**  
Shutters can fold back onto walls

**Option 3. Frame fixed to outside of recess.**  
Shutters can fold back onto walls

**Option 1, 2, & 3 if relevant**  
Measure from top of sill to top of Meeting Rail

Measurements mm

**Option 1**  
Measure from groove between each staff bead and window frame

Measurements mm

**Option 1**  
Measure from top of sill to to groove of staff bead.

Measurements mm
