

An open and shut case for leather Stand: 718

The New England Shutter Company offers custom-made shutter solutions for projects ranging from private homes to restaurants, offices and luxury yachts.

Traditional louvered shutters give radically different looks when covered in hand-stitched leather, suede or fabric. The New England Shutter Company offers a unique and exclusive range of leathers and suedes from simple neutrals through to vibrant shades and will also cover shutters in clients' own fabrics.

New England Shutters also come in solid natural woods including Maple, Oak, Cherry, Teak and Walnut, with a choice of 5 different blade widths, varying from 32mm to 115mm. Also available is the 'Manhattan' design with its clear-view system entirely concealed within the shutter construction to give a sleek contemporary look.

Visit Stand 718 at the International Window Coverings Expo to see the range of shutter styles and coverings available from The New England Shutter Company.
