

Up On The Roof !

Forget saggy old blinds. Now The New England Shutter Company offers a brilliant new way to screen conservatory roofs, glass buildings and lantern lights. Their solid hardwood shutters can be custom-made to fit all the roof angles and windows, bringing architectural definition as well as infinitely adjustable solar shading and privacy.

New England Shutters come in a wide range of timbers including Maple, Oak, Cherry, Teak and Walnut as well as a selection of custom finishes such as painted or covered in leather, suede or fabric. The New England Shutter Company's shutters come in a choice of 4 different blade widths, varying from 47mm to 115mm and are also available in the unique 'Manhattan' design where the tilt mechanism is entirely concealed within the shutter construction, giving a sleek contemporary look.
