

## **NEW YACHT SHUTTERS FROM THE NEW ENGLAND SHUTTER COMPANY**

[The New England Shutter Company](#) now offers a complete shutter design service for [yachts](#).

Shutters have become an increasingly popular choice for yacht owners over blinds or curtains, as they offer clean lines, adjustable light and a luxurious finish to any shape of window.

Nick Garratt, Founder-Director of **The New England Shutter Company**, designed the shutters for a 48 metre superyacht that was being re-fitted at Pendennis shipyard. The yacht was subsequently voted "Best Refit" by ShowBoats magazine and was also a finalist at the Boat International World Superyacht Awards.

The New England Shutter Company offers a full bespoke design service for each project before making and fitting shutters to the exact specification required.

Exclusive to The New England Shutter Company are beautifully stitched faux leather and faux suede Majilite™ covered panels. Alternatively, shutters can be painted in any colour or stain, or produced in solid hardwoods such as Ash, Teak, Oak and Walnut.

Prices on application.
